BETTER SYNDICATE

Better Syndicate, Better Together

SINCE 1992

The Manufacturer and Importer of Scientific Apparatus

Better Syndicate Co., Ltd. is a leading supplier and manufacturer of laboratory equipment, including imported scientific glassware, glass tubes, chemical products, and high-quality water test kits from Europe and Asia. Established in 1992, we also produce a wide range of laboratory products, such as lab gowns, distilled water, and made-to-order glassware tailored to meet customers' specific needs. Our products are designed to meet the highest industry standards, and we are committed to delivering both quality products and exceptional customer service.

VISION

We are committed to delivering the highest level of customer satisfaction through premium-quality scientific equipment and dependable services. As a flexible and trusted scientific partner, we offer comprehensive solutions that meet the needs of our clients — from laboratories to industrial applications.

We strive to foster a robust and sustainable scientific community through our unwavering dedication to quality, reliability, and service from the heart.

PARTNERS

The products we import are supported through long-standing cooperation with our valued partners, including ADWA, Paul Marienfeld GmbH & Co. KG., OPTIKA, Jizerská porcelánka s.r.o., Cowie, ROBU, Wertlab, Micro Essential Laboratory, PolyLab INDUSTRIES PVT. LTD, AZ Instrument Corp, pHydrion®, LGS, V unique, Whiteman, and ANUMBRA™.

With more than 90 years of expertise, Marienfeld Superior is renowned for its commitment to excellence in the development and production of high-quality laboratory equipment.

OPTIKA®

I T A L Y

MICROSCOPE

Our microscope distribution center collaborates with the high-performance international brand 'OPTIKA'.

Our microscopes are suitable for general research laboratories and are available in a variety of models for different applications. We also provide comprehensive after-sales support.

Available models include : B-159, B-192PL, B-193PL, SLX-2, SLX-3, and USB Camera C-B3.

- **Among our product lineup, the B-159 stands out as one of the best-selling and most widely favored models.**

Advanced Digital Water Analysis

Adwa Instruments is a manufacturer of measurement devices for pH, TDS, ORP, DO, and temperature.

Founded in 1998, the company is headquartered in Szeged, Hungary, with its production facility located in Romania, Europe.

Adwa is recognized as a leading producer of high-quality measurement instruments for product and environmental monitoring.

AD1040 Professional pH-ORP-TEMP
Bench Meter (With Out ORP Probe)

AD12 Waterproof pH-TEMP Pocket
Testers with replaceable electrode

HYDRION

Our pHydrion paper is recognized for its quality, accuracy, and reliability.

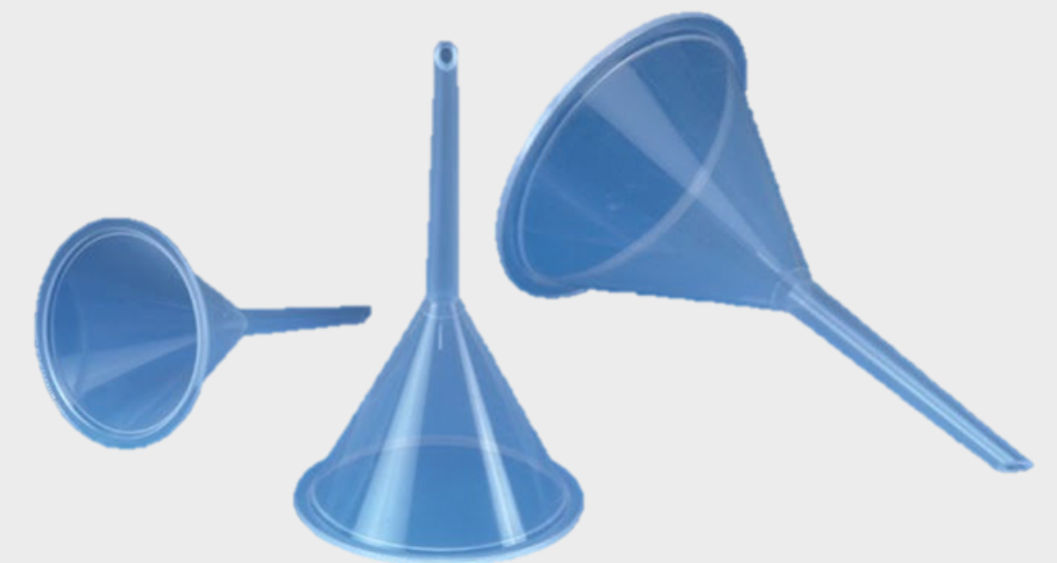

The pHydrion® test paper and pH buffer standards in our product range are widely used in laboratories, hospitals, and universities around the world.

PolyLab®

Our products are used in all types of laboratories-
institutional, industrial, research, school,
and university.

We take pride in manufacturing the
highest quality products and
providing excellent service to our customers.

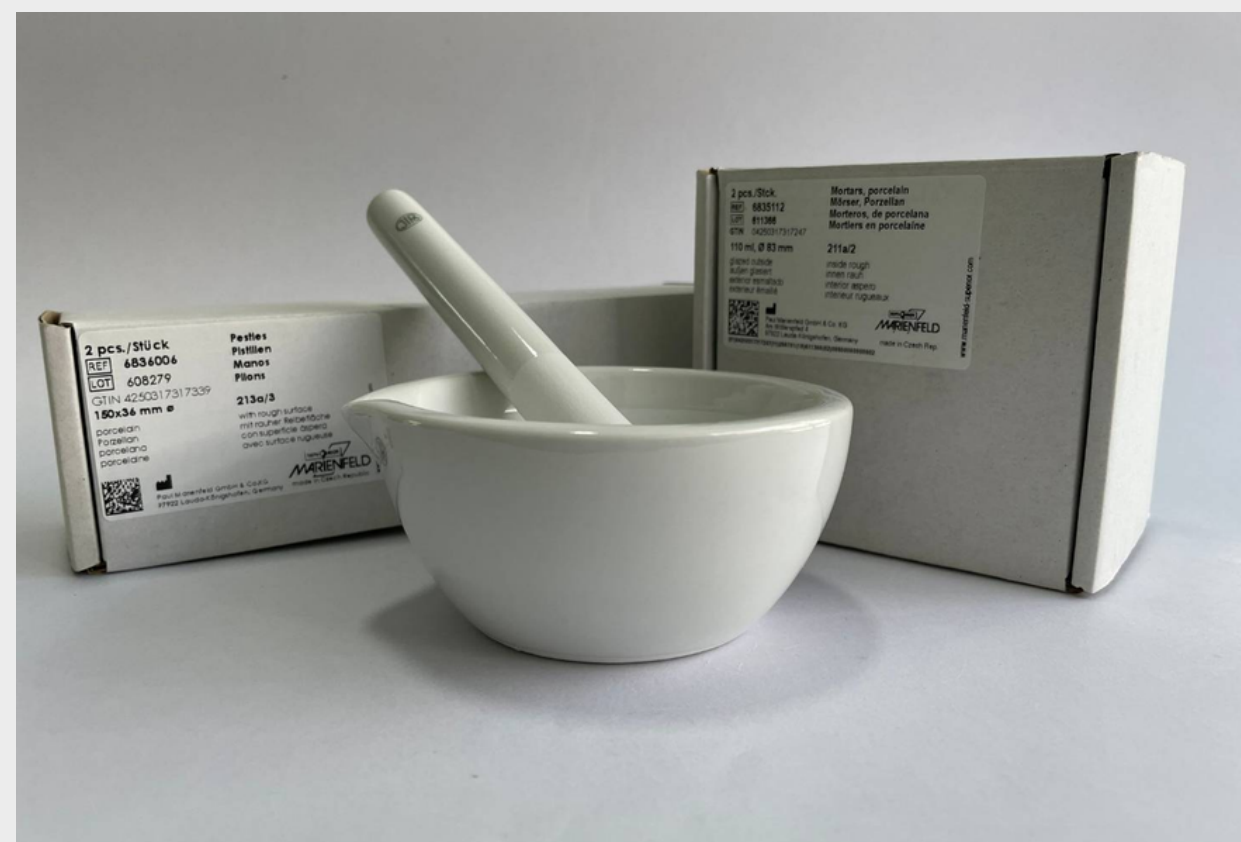

pH/Cond/TDS/Salt/
DO meter AZ86031

Salinity meter (Pen type) AZ 8372
range 0~9999 ppm , 10.0~100.0 ppt

Glassware from Wertlab Germany is made of borosilicate glass, featuring excellent heat resistance, a low coefficient of thermal expansion, and strong chemical durability. Each product is accompanied by a certificate of authenticity.

ROBU®

Filter Funnel

Filter Crucible

LGS

The company designs, develops, and manufactures PTFE products, which are supplied and distributed to various industries worldwide, including laboratories, pharmaceuticals, chemical processing, biochemistry, electronics, fluid flow, temperature measurement, aerospace, general engineering, and refrigeration.

These products are available in a variety of sizes and shapes to meet diverse application needs.

Magnetic Bar Plain

Magnetic Bar Plain 10x6 mm.
Magnetic Bar Plain 20x7 mm.
Magnetic Bar Plain 30x7 mm.
Magnetic Bar Plain 50x10 mm.
Magnetic Bar Plain 60x10 mm.
Magnetic Bar Plain 70x10 mm.
Magnetic Bar Plain 80x10 mm.

Maintaining high water quality is essential for both industry and the environment. We offer specialized water testing kits designed to provide reliable and efficient results for manufacturing, fisheries, agriculture, environmental monitoring, laboratory analysis, and research, backed by more than 20 years of experience. Our manufacturing facility adheres to recognized standards and uses stable chemicals that deliver fast and accurate results. We are committed to providing efficient and trustworthy testing services to our customers.

pH test kit
'V-color 4590'

Chlorine test kit
'V color 9720'
(Range: 0.15-2.00 mg/l)

Pure distilled water is produced through heating, evaporation, and condensation, resulting in clean, colorless, contaminant-free water

The purity of distilled water is assessed by its neutral to slightly acidic pH and low conductivity, indicating minimal impurities.

These characteristics define the quality of **'pure distilled water'**

Better Syndicate Co., Ltd. has been a leading producer of distilled water for nearly 20 years, using modern machinery and optimized processes developed by experts to ensure the highest purity.

We also emphasize strict quality control and inspection throughout production process.

2 Litres

(บรรจุ 6 BOT/1PK)

Specification

WATER
(DISTILLED WATER)
For Microbiological Purposes
H₂O Formular Weight 18.01
Produced by Distillation Process

Specification:
Electrical Conductivity < 1.5 µs/cm at 25 °C
Electrical Resistivity > 0.7 MΩ x cm at 25 °C
Hardness < 0.1 mg/l as CaCO₃
pH 6.5 ± 1
Heavy Metal < 0.01 mg/l
Total Bacteria < 100 CFU/ml
Volume 2 litres

Better Syndicate Co.,Ltd.

5.5 Litres

(บรรจุ 2 BOT/1PK)

Specification

WATER
(DISTILLED WATER)
H₂O Formular Weight 18.01
Produced by Distillation Process
For Analytical Purposes

Specification:
Electrical Conductivity < 1.5 µs/cm at 25 °C
Electrical Resistivity > 0.7 MΩ x cm at 25 °C
Hardness nil
pH 6.5 ± 1
Heavy Metal nil
Volume 5.5 litres

Whiteman

ANUMBRA®

PETRI DISHES
Made of sodalime glass

GLASS BLOWING BSC

Better Syndicate Co., Ltd. has over 20 years of experience in glass blowing, supported by professional craftsmen. Every component is carefully handled to ensure long-lasting durability.

We sincerely thank all our customers for giving us the opportunity to serve them over the years.

We remain committed to maintaining quality and continuously improving our products to meet the needs of all customers.

Boiling Flask with
Stopcock

Evaporating Flask

Flask Pear Shape

Coil Condensor

LAB GOWN BSC

Our gowns are designed for students, medical professionals, industrial workers, and laboratory staff. They are available in sizes ranging from S to XL, including custom sizes with both short and long sleeves. We also provide custom logo embroidery services upon request.

These high-quality gowns are breathable, moisture-resistant, and stylish-perfect for those who wish to express their professional identity.

Short Sleeve Lab Gown

Long Sleeve Lab Gown

DURHAM TUBES BSC

The 6x50 mm Durham tube is made from durable soda-lime glass and is commonly used to measure gas production during bacterial fermentation in microbiology. Better Syndicate Co., Ltd. offers high-quality Durham tubes designed to meet the highest standards in microbiological research.

The procedure involves placing the growth medium in a test tube, then inverting the Durham tube inside it. If microorganisms grow and produce gas, the gas becomes trapped inside the Durham tube.
